Introduction to Cybersecurity Tools & Cyberattacks

Kesavan Aswin E

Cyber Security Postgrad | Ethical Hacking & Web App Security | Frontend Developer | Oracle Cloud AI Certified | Actively Seeking Cybersecurity Internships

Nagercoil, Tamil Nadu, India

Summary

Security-minded developer turning into a cybersecurity analyst — I understand how applications are built, which is exactly why I'm learning how they're broken. I'm pursuing an MSc in Cyber Security (AJK College, 2025–27) after building a solid frontend foundation (HTML, CSS, JavaScript, React) during my BCA. That build-side experience now shapes how I approach security: I don't just look for vulnerabilities in the abstract — I understand the code paths, business logic, and common developer mistakes that create them. What I bring: • Practical exposure to the OWASP Top 10 through hands-on vulnerability assessment (Prodigy InfoTech) • Daily hands-on practice via TryHackMe (Advent of Cyber 2025 completed) • Certified: Google Foundations of Cybersecurity, Oracle Cloud AI, Cybersecurity Tools & Cyberattacks • A developer's eye applied to web application security — I read code before I attack it Currently targeting: Internships or entry-level roles in SOC Operations, Vulnerability Assessment & Penetration Testing (VAPT), or Web Application Security. Open to relocating / remote work. Let's connect if you're hiring, mentoring, or just talking threat intel — always happy to compare notes.

Experience

Prodigy InfoTech

Cyber Security Student

December 2025 - January 2026 (2 months)

Mumbai, Maharashtra, India

•Completed a structured, hands-on cybersecurity training program focused on network security fundamentals, vulnerability assessment, and secure coding. • Identified and documented OWASP Top 10 vulnerabilities (XSS, SQLi, broken auth) across sample web applications • Delivered mentor-reviewed remediation reports for each finding, translating technical risk into actionable fixes

• Applied secure coding principles learned during frontend development work to strengthen vulnerability analysis

YBI Foundation
Online Intern
July 2024 - July 2024 (1 month)

One-month remote internship focused on [web development / data analysis — confirm which]. Completed structured project tasks within sprint deadlines, gaining exposure to real-world workflows and remote collaboration tools. (Action: replace the bracket with the actual domain you worked in, or drop this role — a visibly unedited placeholder hurts credibility more than a missing internship would.)

Aspro Technologies
Business Development Executive
November 2023 - April 2024 (6 months)
Nagercoil, Tamil Nadu, India

Supported client acquisition and lead-generation efforts in a hybrid role, developing stakeholder communication and outreach skills later applied to technical project collaboration. • Managed outreach across [X] leads/month (add a real number if you have one — even an estimate), sharpening the client-facing communication skills valuable in SOC/analyst roles that require clear incident reporting.

Education

AJK College of Arts and Science - India
Master of Science, Cyber security · (August 2025 - August 2027)

S.T.Hindu College - India
Bachelor of Computer Application · (August 2022 - May 2025)
